Condizioni generali di vendita

PREZZI - I prezzi nel presente catalogo, salvo diversa indicazione, sono espressi in € e si riferiscono se non specificato, al singolo pezzo o al metro lineare.

PAGAMENTO - Il committente è tenuto a pagare secondo le date pattuite. Nel caso di ritardi, per qualsiasi ragione, saranno addebitati gli interessi di mora pari ad un tasso uguale al tasso di sconto ufficiale in vigore durante il periodo d'insolvenza. La società si riserva in qualsiasi momento il diritto di sospendere le forniture qualora ravisasse nel committente insolvenze o esposizione troppo elevata. Eventuali contestazioni per difetti della merce fornita o per ritardi di fornitura, non possono costituire in nessun caso motivo di sospensione dei pagamenti.

CONSEGNA - I termini di consegna sono da ritenersi indicativi e sono espressi in giorni lavorativi. La consegna è effettuata al massimo entro 30 gg dalla ricezione dell'ordine. Eventuali ritardi non potranno giustificare l'annullamento dell'ordine né richieste di risarcimento per eventuali danni diretti o indiretti.

TRASPORTO - La merce viaggia sempre a rischio e pericolo del committente anche quando è stato concordato il franco destino. Se all'arrivo la merce o l'imballaggio ha subito danni, il Cliente è tenuto a contestarli allo Spedizioniere. Se il danno è dovuto a nostra negligenza, le contestazioni saranno accettate solo se riportate sul documento di trasporto ed in tutte le copie.

RESI - Non si accettano resi se non preventivamente autorizzati dalla nostra Società. Al ricevimento del reso sarà emessa nota di accredito, previo controllo della merce e del suo imballo, dedotta di eventuali costi per il ripristino della merce, di trasporto o di rifacimento imballi.

CARATTERISTICHE TECNICHE - Tutte le caratteristiche tecniche riferite ai nostri prodotti presenti nel catalogo, sono da considerarsi indicative. Ci riserviamo in qualsiasi momento di approvare variazioni sia tecniche che estetiche, senza nessun preavviso.

CONTROVERSIE - Per qualsiasi controversia il foro competente è quello di Torino.

PRICES - The prices in this catalogue are in €, unless otherwise indicated, Prices apply to each single piece or per linear meter, if not specified otherwise.

PAYMENT - Customer payment is required according to the agreed-upon dates. In case of any delay for any reason, default interest will be charged equal to the official discount rate in effect during the contested period. Our company reserves the right at any time to suspend the supply of materials in cases where the buyer shows excessive signs of exposure and insolvency. Possible complaints due to defects or delays of the supplied merchandise constitute no reason for suspension of payment.

DELIVERY - Terms of delivery are only indicative and are expressed in work-days. Utmost effort is made to deliver within 30 days of receipt of the order. Possible delays will not justify cancelling nor modification of the terms and conditions of the order, as a result of direct or indirect damages.

TRANSPORTATION - The merchandise travels at buyer's own risk even when D.D.P. delivery has been agreed upon. If upon arrival the merchandise or packaging is damaged, the customer must notify the shipping agent. If damage is due to our negligence, notification of the charges will be accepted only if they are reported on the original and all copies of the shipping document.

RETURNED MERCHANDISE - Merchandise can be returned only if it has been previously agreed upon with our company. Upon receipt of returned merchandise and after inspection of the goods and packaging, a credit note will be issued. A deduction for possible costs for any necessary maintenance/repair/overhaul, repackaging, and shipping will be applied.

TECHNICAL CHARACTERISTICS - All the technical characteristics referred to the products in our catalogue are indicative. We reserve the right at any moment to make any variations, technical or in appearance, without prior notice.

DISPUTES - For any claims, the laws of the court of Turin, Italy will apply.

PRIX - Les prix indiqués en catalogue sont en €, sauf indication différente et ils se réfèrent à une pièce ou mètre linéaire.

PAIEMENT - Le client s'engage à payer aux échéances concordées. En cas de retard, pour n'importe quelle raison, il y aura à payer les intérêts moratoires dans la même mesure du taux d'escompte officiel en vigueur pendant la période d'insolvabilité. La société se réserve en tout moment le droit de suspendre les fournitures en cas d'insolvabilité du client ou en cas d'exposition financière trop élevée. D'éventuelles reclamations pour défauts de marchandise fournie ou pour des retards de livraison ne peuvent en aucun cas être motif de suspension de paiements.

LIVRAISON - Les termes de livraison sont indicatifs et sont indiqués en jours ouvrables. La livraison est effectuée dans un maximum de 30 jours de la réception de la commande. D'éventuels retards ne justifieront pas l'annulation de la commande ni demandes de remboursement pour d'éventuels dommages directs ou indirects.

TRANSPORT - La marchandise voyage aux risques et périls du destinataire même en cas de vente DDP. Si la marchandise ou l'emballage présentent des dommages, le client à réception est tenu à le signaler au courrier. Si le dommage est dû à notre négligence, les contestations seront acceptées uniquement si mentionnées sur le document de transport et sur toutes les copies.

RETOUR DE MARCHANDISE - La société n'accepte aucun retour sans accord préalable. À réception de la marchandise retournée la société émettra une note de crédit après contrôle des marchandises et emballages, avec déduction éventuelle des coûts pour le recouvrement des marchandises, transport ou réemballage.

CARACTERISTIQUES TECHNIQUES - Toutes les caractéristiques techniques relatives à nos produits en catalogue doivent être considérées indicatives. La société se réserve le droit d'apporter, en tout moment, des modifications techniques et esthétiques sans aucun préavis.

LITIGES - En cas de litiges, le tribunal de Turin est le seul compétent.

Condizioni generali di vendita

PRECIOS - Los precios en el presente catálogo son en € y se refieren por pieza o por metro lineal, a menos que no haya sido previamente especificado de otra manera.

PAGO - El cliente se compromete a pagar en las fechas establecidas. En el caso de demora, por cualquier motivo, le serán adeudados cargos de mora con intereses iguales a la tasa del descuento oficial en vigor durante el período de insolvencia. La sociedad se reserva en cualquier momento el derecho de suspender el envío de la orden si esta descubriera la existencia de insolvencias o exposición demasiado elevadas por parte del cliente. Eventuales reclamos debidos a defectos de la mercancía o retrasos en el envío de la misma, no constituyen en ningún caso motivo para suspender los pagos.

ENTREGA - Los términos de entrega son solamente indicativos y son expresados en días laborales. La entrega se efectúa como máximo dentro de 30 días de recibida la orden. Eventuales demoras no pueden justificar la anulación de la orden ni la demanda de indemnización por eventuales daños directos o indirectos.

TRANSPORTE - La mercancía viaja siempre por riesgo y cuenta del cliente aún cuando se haya acordado el flete a destino (D.D.P.). Si a la llegada, la mercancía o el embalaje han sufrido daños, el cliente deberá presentar su reclamo al expedidor. Si el dano es debido a nuestra negligencia, los reclamos serán aceptados solamente si éstos están especificados en el original y en todas las copias del documento de transporte.

DEVOLUCIONES - No se aceptan devoluciones sin la previa autorización de nuestra Sociedad. Al recibo del material devuelto se emitirá una nota de abono sólo después que la mercancía y el embalaje sean controlados. En caso necesario si hubieran ulteriores costos de mantenimiento, transporte o de nuevo embalaje, éstos serán restados de la nota de abono.

CARACTERISTICAS TECNICAS - Todas las características técnicas que se refieren a nuestros productos presentes en este catálogo son de forma indicativa. Nos reservamos el derecho en cualquier momento de hacer variaciones sean éstas técnicas o estéticas, sin previo aviso.

CONTROVERSIAS - Para cualquier controversia, se aplicarán las leyes de la corte de Turín, Italia.

ЦЕНЫ - цены в настоящем каталоге, если не указано иное, указаны в Евро и относятся, если нет других обозначений к одной единице товара или метру погонному.

Оплата - Покупатель обязан оплатить товар в соответствии с указанными сроками. В случае не оплаты, Покупатель должен будет оплатить пеню Продавцу. Если Покупатель вовремя не оплатил заказанный продукт, производитель имеет право отклонить все намеченные поставки с Покупателем. Покупатель обязан оплатить товар, даже если были задержки по срокам и изготовлению заказанного продукта.

Сроки поставки - отгрузка товара осуществляется только в рабочие дни. Максимальный срок поставки 30 рабочих дней с момента подтверждения заказа. При задержке срока поставки товара - производитель ответственности не несёт.

Транспорт - При транспортировке товара - ответственность несет Покупатель или перевозчик. Если товар или упаковка были повреждены, Покупатель вместе с перевозчиком должны составить акт.

Брак - Бракованный товар без соответствующего подтверждения производителя не принимается. Если брак признается по вине производителя - деньги возвращаются Покупателю.

Технические характеристики - все характеристики указанные в каталоге могут быть ориентировочные и (или) изменятся без уведомления Покупателя.

Споры и разногласия - Неурегулированные в претензионном порядке споры, подлежат к рассмотрению в суде по месту дислокации ответчика Турин - Италия.

PREISE - Die Preise in diesem Katalog, sofern nicht anders angegeben, sind in € ausgedrückt und beziehen sich, wenn nicht anders angegeben, auf Einzelstück oder pro Meter.

BEZAHLUNG - Der Kunde muss innerhalb der bestimmten Frist zahlen. Im Falle einer Verspätungen, aus irgendeinem Grund, werden die Verzugszinsen nach dem gleichen Satz des offiziellen Diskontsatz geltenden, während die Zeit der Insolvenz, gerechnet. Das Unternehmen behält sich das Recht vor, jederzeit ohne Vorankündigung, die Lieferungen auszusetzen, wenn Insolvenz oder zu hohe Exposition des Käufers erkennt. Mögliche Anträge für defekte der gelieferten Waren oder Verspätungen, können nicht in jedem Fall als Grund für die Aussetzung von Zahlungen sein.

LIEFERUNG - Die Lieferbedingungen sind beispielhaft und werden in Arbeitstagen ausgedrückt. Die Lieferung wird innerhalb von 30 Tagen durchgeführt.

TRANSPORT - Die Ware reisen immer auf Risk und Gefahr des Kunden, auch wenn das Schicksal vereinbart ist. Wenn die Ware eingetroffen ist oder die Verpackung beschädigt wurde, ist der Kunde verpflichtet, mit dem Absender zu konkurrieren. Wenn der Schaden auf unsere Fahrlässigkeit zurückzuführen ist, werden die Streitigkeiten nur akzeptiert, wenn sie auf dem Transportdokument und in allen Kopien gemeldet werden.

RÜCKGABE - Rücksendungen werden nicht angenommen, wenn sie zuvor von unserer Firma genehmigen worden. Am Empfang der zurückgegebenen Waren, nach Prüfung des Inhalts und der Verpackung, werden wir eine Gutschrift, abzüglich der Kosten für den Wiederherstellungskosten der Waren, den Transport oder Verpackung, auszugeben.

TECHNISCHE DATEN - Alle technischen Eigenschaften unserer Katalogprodukte, sind nur beispielhaft. Wir behalten uns jederzeit das Recht vor, technischen als auch ästhetischen Änderungen zu genehmigen, ohne vorherige Ankündigung.

STREITFÄLLE - Für jeden Rechtsstreit ist das Gericht von Turin zuständig

I materiali

I materiali utilizzati per la realizzazione dei prodotti Nova-Ferr srl sono:

- Acciaio:** per i reparti di stampaggio lamiera
- Trafilati:** per il reparto torneria
- Laminati:** per il reparto a controllo robotizzato ruote
- Filo acciaio:** per il reparto stampaggio a freddo

I materiali sono esclusivamente materiali certificati, reperiti dalle più importanti acciaierie Europee. Inoltre tutti i materiali metallici, finiti, semilavorati e grezzi, subiscono nei vari percorsi produttivi: verifiche strutturali e verifiche tramite rilievo delle caratteristiche meccaniche e tecnologiche, garantendo una sempre e più valida strategia di orientamento nelle scelte dei materiali e nella ricerca delle performance.

Per garantire la giusta resistenza alle severe condizioni climatiche cui sono sottoposti i nostri prodotti ed ai sempre crescenti requisiti estetici, tutti gli articoli prodotti dalla NOVA-FERR srl vengono sottoposti a trattamenti superficiali come la **verniciatura e la zincatura**.

I prodotti verniciati identificati con il bollino,

subiscono, a garanzia di quanto evidenziato, i trattamenti illustrati di seguito:

Fosfatazione, cataforesi ed esposizione alla polvere epossidica.

Le certificazioni

Considerazioni tecniche

**La scelta dell'interasse è puramente strategica,
Data lo schema rappresentativo (Vedi Pag. 19):**

$$F_1 = F_2 + P$$

$$F_2 = \frac{P \times (L/2 + A)}{I}$$

- Se $I \rightarrow 0$ ossia se i carrelli sono molto vicini allora $F_2 \rightarrow \infty$ e $F_1 \rightarrow \infty$

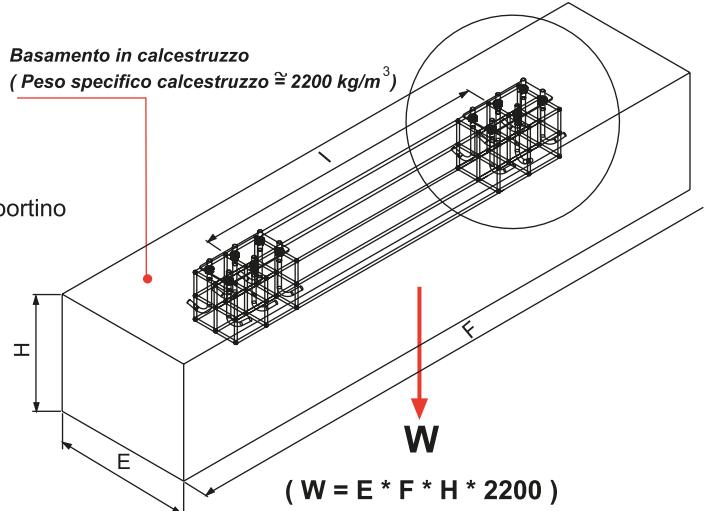

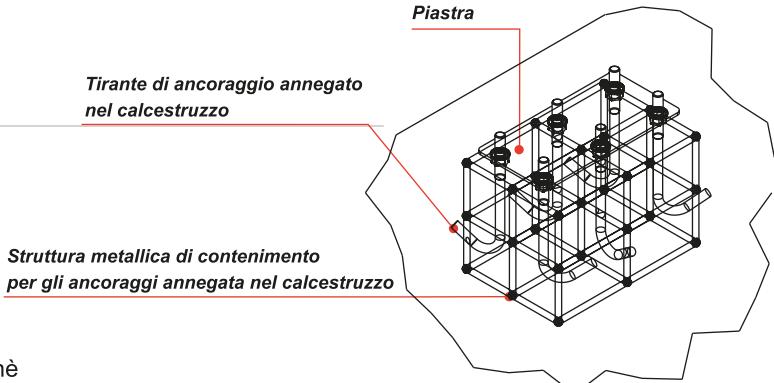

In questo caso bisognerebbe avere F_1 elevatissima affinché il sistema autoportante possa funzionare e i due carrelli sopportino la portata a sbalzo.

- Se $I \rightarrow \infty$ ossia se i carrelli sono molto distanti allora $F_2 \rightarrow 0$ e $F_1 \rightarrow P$

In questo caso bisognerebbe avere F_1 pari al peso del cancello affinché il sistema autoportante possa funzionare e i due carrelli sopportino la portata a sbalzo.

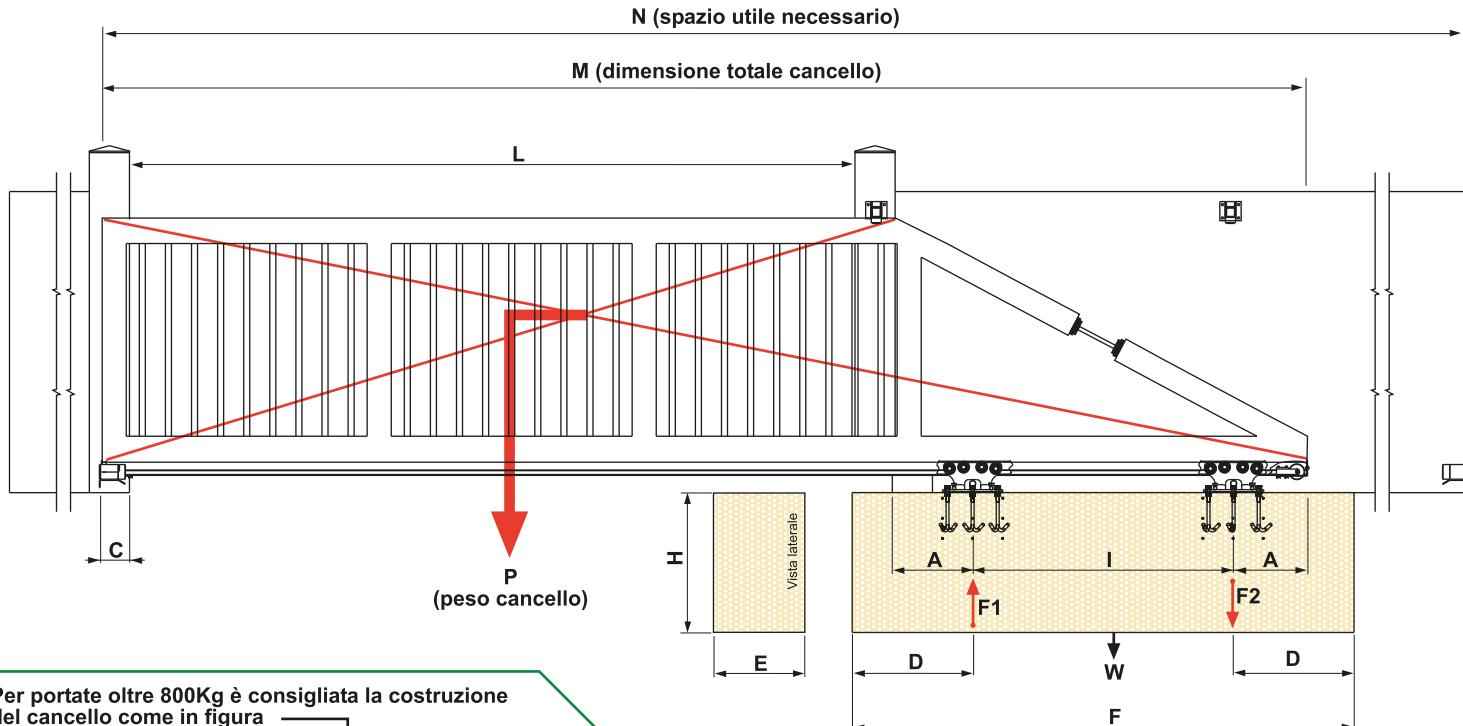

- Consigliabile:

$$I_{(min)} = \frac{L}{3} \quad \text{a comunque } \frac{L}{3} < I < L$$

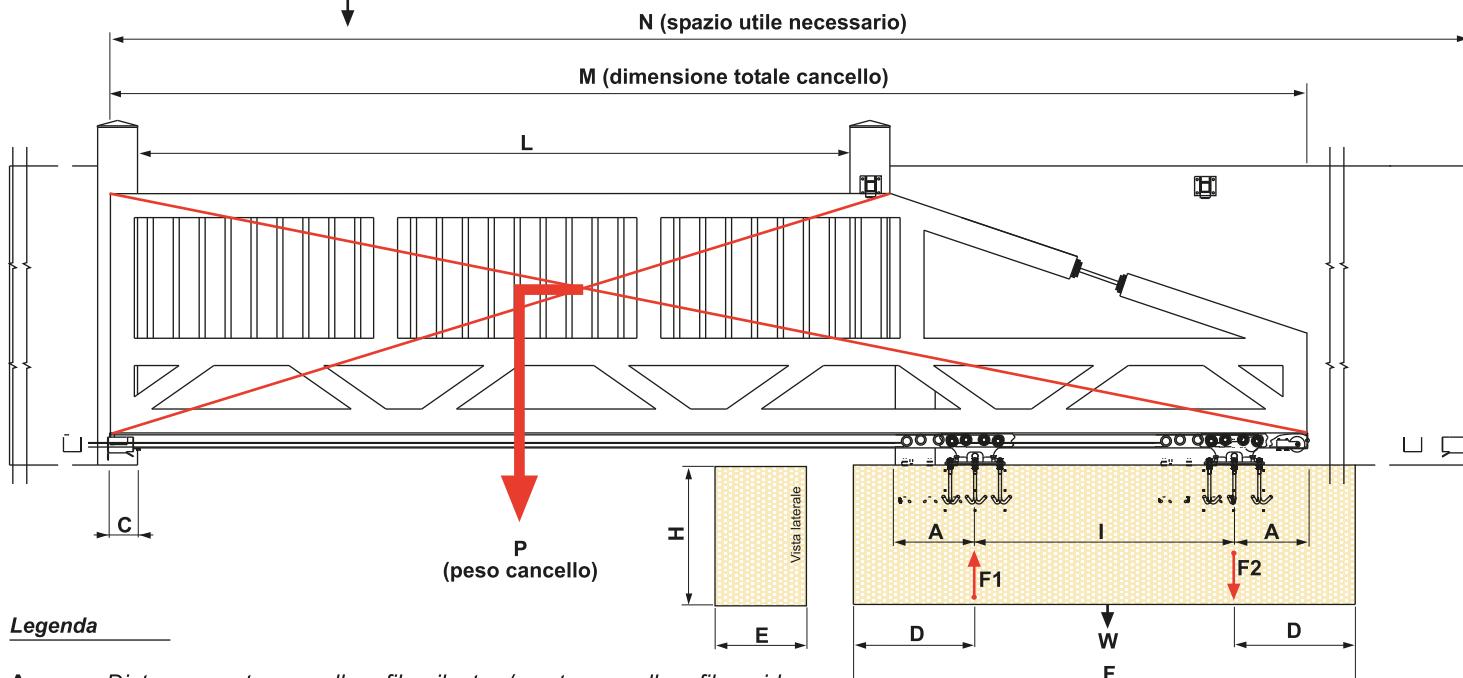

Per un corretto dimensionamento del basamento è opportuno che W sia $> 2,5 F_2$, questo per contrastare il peso del cancello a sbalzo

Applicazione carrello autoportante

Per portate oltre 800Kg è consigliata la costruzione del cancello come in figura.
Data la sua particolare struttura a "traliccio" si nota una maggiore resistenza alla flessione.

Legenda

- A** Distanza centro carrello a filo pilastro / centro carrello e filo guida (m)
- I** Interasse tra i due carrelli $I_{(min)} = L/3$ (m)
- C** Ingombro battente d'arresto (m)
- D** Distanza filo basamento centro carrello (m)
- E** Larghezza del basamento in cemento armato (m)
- F** Lunghezza del basamento in cemento armato (m) $F_{(min)} = 2D + I$
- H** Altezza del basamento in cemento armato (m)
- L** Luce netta di passaggio (m)
- M** Lunghezza totale del cancello e guida (m) $M = L+2A+I+C$
- N** Spazio utile necessario per funzionamento cancello (m) $N = 2M - (I+2A)$
- F1** Forza di reazione alla compressione (forza massima a cui è sottoposto il portone) (kgf)
- F2** Forza di reazione alla trazione (reazione per equilibrare la parte a sbalzo) (kgf)
- W** Peso basamento in cemento armato (kgf) $W = F \cdot E \cdot H \cdot 2200$

Tipologia ruote

ZINCATURA

Tutte le nostre ruote subiscono una protezione superficiale da 7μ a 11μ classe II a garanzia dei requisiti richiesti.

All our wheels are protected from 7μ to 11μ class II to guarantee the demanded requirements.

CATAFORESI

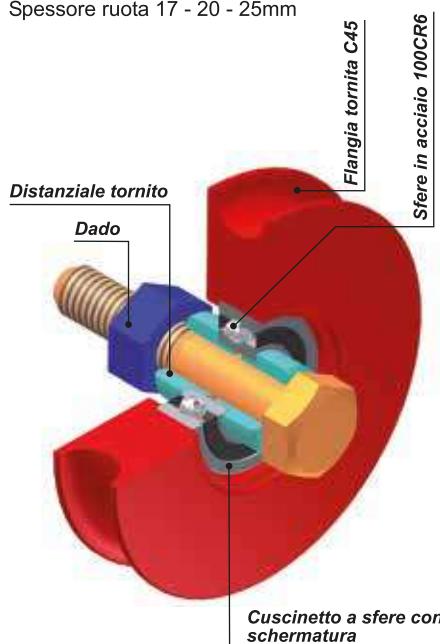

La Cataforesi è caratterizzata dal deposito uniforme di una resina epossidica che assicura a lungo una straordinaria protezione nei confronti di tutti gli agenti atmosferici e di qualunque altro tipo di attacco.

The cataphoresis is characterized by the even deposit of an epoxy resin that guarantees a long and extraordinary protection towards every atmospheric agent and to any other type of attack.

Caratteristiche generali

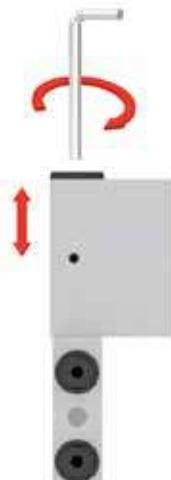

Registrazione in profondità

Patented

*Grazie al dispositivo brevettato
riusciamo a registrare fino a 4mm
l'alella in alluminio fissata al montante*

Registrazione in altezza

Lavorazioni su alette

Secondo le esigenze di ogni cliente, le cerniere vengono realizzate a disegno con la possibilità di effettuare qualsiasi lavorazione sulle alette in lamiera

*Le alette in lamiera
possono essere piegate
a disegno in base ai vari
telai utilizzati*

In caso di cerniera ambidestra girare l'ala in base alle esigenze, regolare il grano e fissarlo con grano più piccolo.

Caratteristiche GENIOBLOK

Il GENIOBLOCK viene consegnato in confezione BLISTER all'interno di un BOX di cartone studiato apposta per essere collocato su scaffalature a rastrelliera o su banconi per un agevole prelievo per il cliente finale.

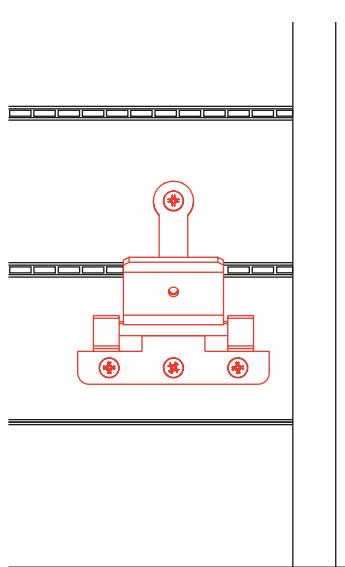

Se il dispositivo GENIOBLOCK interviene, rimane bloccato segnalando il tentativo di scasso.

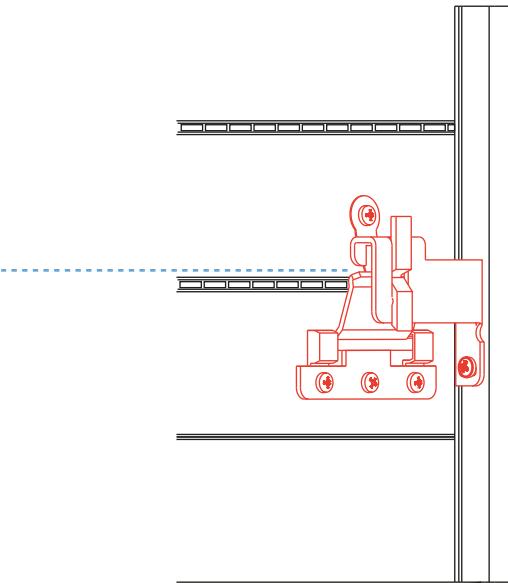

Per sbloccare il dispositivo agire sulla leva tirandola verso di se

All'interno del BLISTER ci sono 2 dispositivi GENIOBLOCK uno da posizionare sul lato sx della tapparella, uno sul lato dx della tapparella.

Installazione su tapparella, tramite ditta di foratura predisporre i fori sulla doga della tapparella tramite le viti in dotazione fissare il dispositivo

Installazione su montante, presentare il dispositivo sul montante laterale, fare i fori ed ancorare lo stesso al montante

Applicazione carrello autoportante

Per portate oltre 800Kg è consigliata la costruzione del cancello come in figura
Data la sua particolare struttura a "traliccio" si nota una maggiore resistenza alla flessione.

Considerazioni tecniche

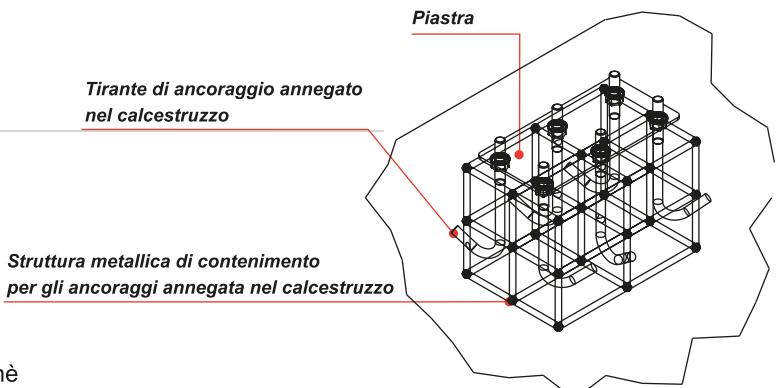

**La scelta dell'interasse è puramente strategica,
Data lo schema rappresentativo (Vedi Pag. 19):**

$$F_1 = F_2 + P$$

$$F_2 = \frac{P \times (L/2 + A)}{I}$$

- Se $I \rightarrow 0$ ossia se i carrelli sono molto vicini allora $F_2 \rightarrow \infty$ e $F_1 \rightarrow \infty$

In questo caso bisognerebbe avere F_1 elevatissima affinché il sistema autoportante possa funzionare e i due carrelli sopportino la portata a sbalzo.

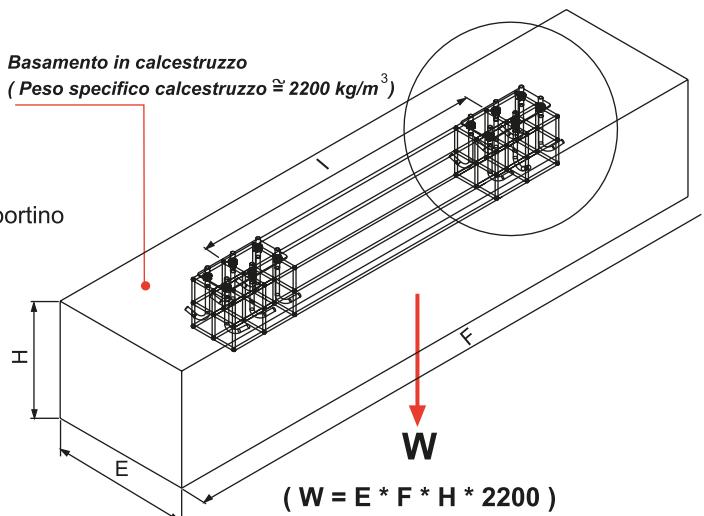

- Se $I \rightarrow \infty$ ossia se i carrelli sono molto distanti allora $F_2 \rightarrow 0$ e $F_1 \rightarrow P$

In questo caso bisognerebbe avere F_1 pari al peso del cancello affinché il sistema autoportante possa funzionare e i due carrelli sopportino la portata a sbalzo.

- Consigliabile:

$$I_{(min)} = \frac{L}{3} \quad \text{a comunque } \frac{L}{3} < I < L$$

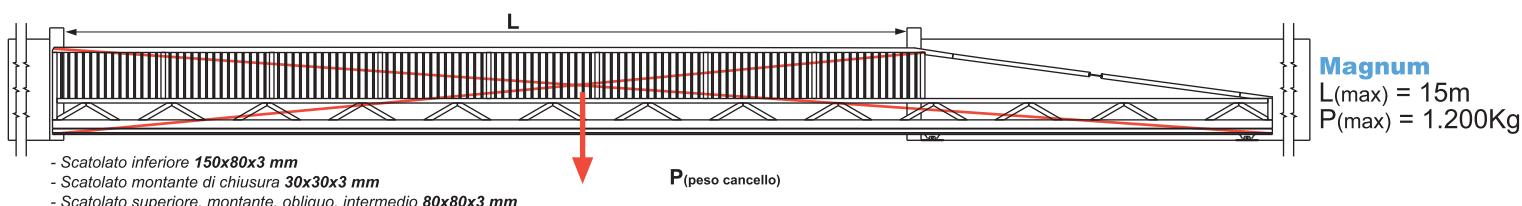

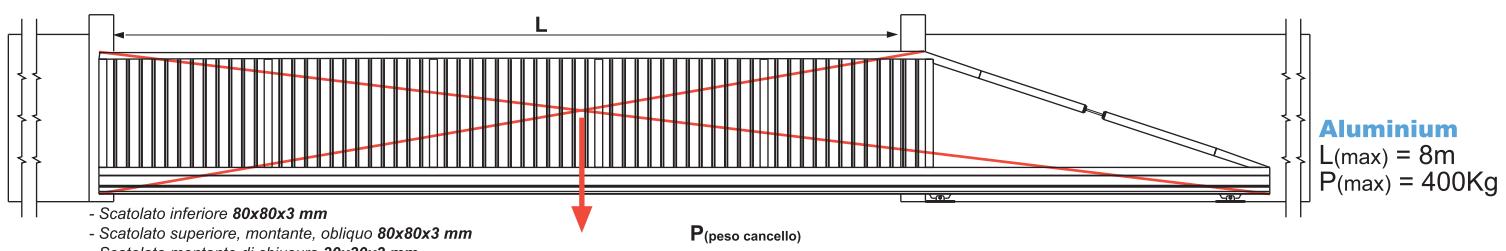

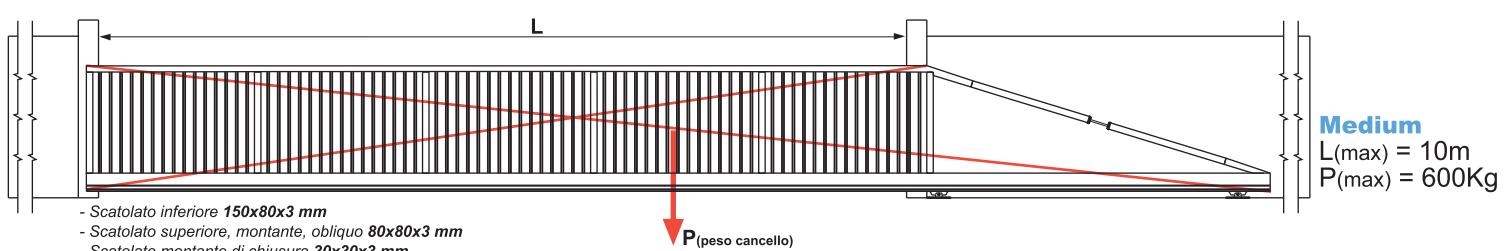

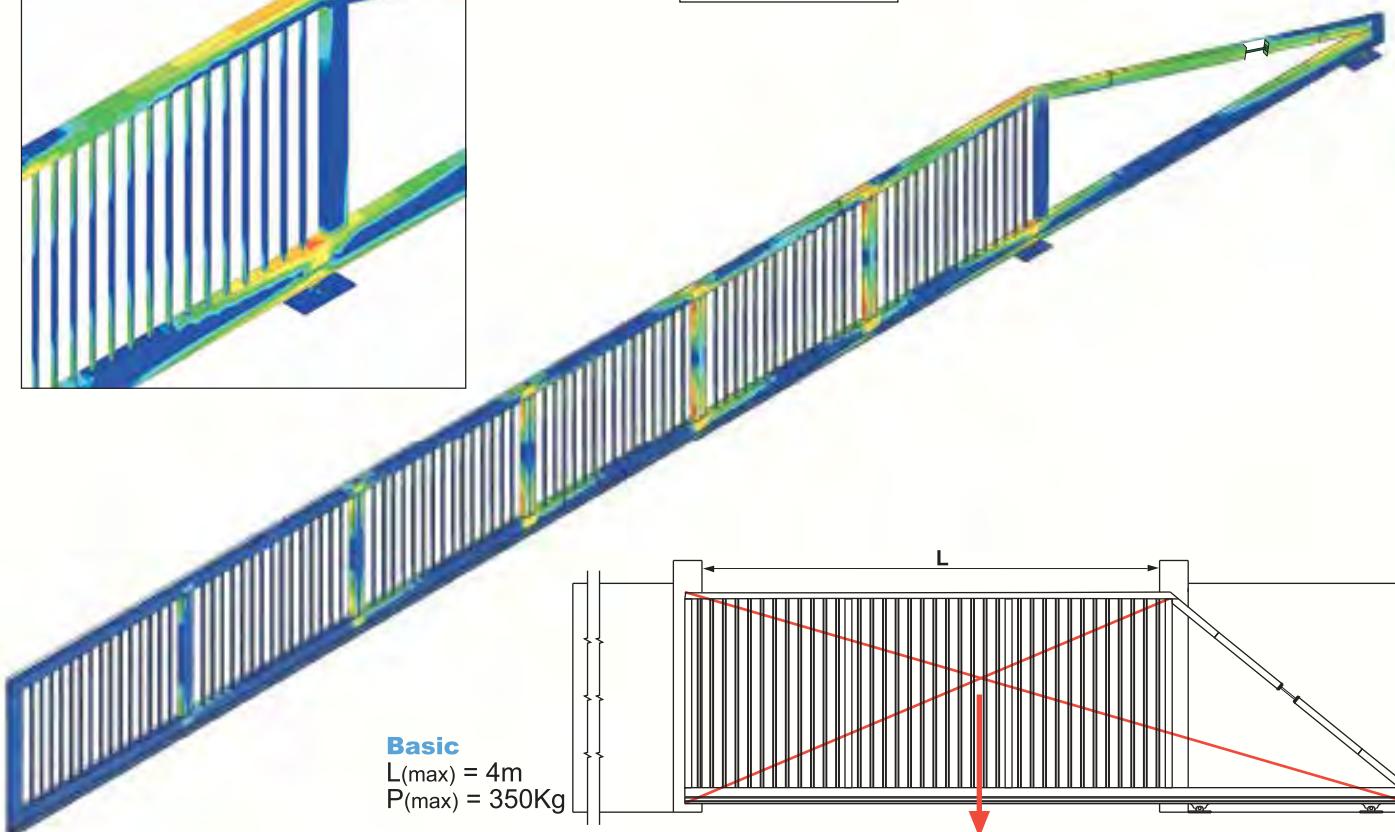

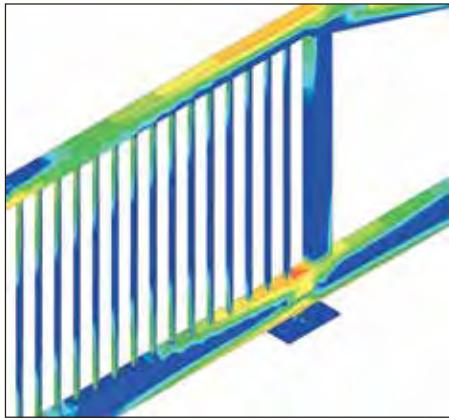

Per un corretto dimensionamento del basamento è opportuno che W sia $> 2,5 F_2$, questo per contrastare il peso del cancello a sbalzo

Certificazionei sistema NOVAGUIDE®

NOVAGUIDE

Gli anni di esperienza nel settore, e il continuo contatto con le problematiche di ogni singolo installatore hanno fatto sì che la **Nova-Ferr srl** riuscisse con il perfezionamento del **sistema NOVAGUIDE®** a diventare il partner di qualità dando la giusta affidabilità, precisione, garanzia, funzionalità, versatilità, efficacia al proprio prodotto.

La **marcatura CE** del **sistema NOVAGUIDE®** è la conferma al continuo perseguitamento nel cercare di risolvere tutte quelle problematiche che ad oggi i nostri clienti trovano di difficile soluzione.

Tramite il **sistema NOVAGUIDE®** è possibile certificare Portoni a libro e scorrevoli, Cancelli a battente e scorrevoli.

Innovare significa andare alla ricerca di nuove soluzioni, nuovi progetti, mercati o modelli organizzativi. Ma perché l'innovazione sia utile, deve tradursi in un significativo aumento di competitività sui mercati. Per questo è importante disporre della consulenza di professionisti in grado di valutare le specifiche esigenze del cliente, in modo da attuare le strategie più appropriate.

Uno staff di tecnici è a disposizione di tutti quelli che credono in modo concreto al significato di Sicurezza, Garanzia che la **marcatura CE** vuole dare e significare.

Marcare CE significa che oltre a fabbricare e vendere un cancello e/o portone, bisogna garantirlo e rilasciare, come previsto dalla **direttiva Prodotti da Costruzione 89/106/CEE**, una dichiarazione di conformità **CE** all'acquirente, nonché una targhetta **CE** da apporre sul manufatto in conformità alla **Direttiva 93/68/CEE**.

I passi per il raggiungimento della certificazione grazie al **sistema NOVAGUIDE®** della ditta **Nova-Ferr srl** sono:

- Accordo tecnico commerciale tra **Nova-Ferr srl** e la ditta assemblatrice.
- Consegna del fascicolo tecnico **Nova-Ferr srl** sistema **NOVAGUIDE®**
- Dichiarazione di conformità CE con cui si attesta la rispondenza del prodotto costruito come da Dir. UE 89/106/CEE (modulo prestampato e da consegnare alla ditta **Nova-Ferr srl** alla fine dell'assemblaggio del manufatto).
- Consegna del Manuale Installazione, Uso e Manutenzione (istruzioni operative) da parte della **Nova-Ferr srl**.
- Consegna della Targhetta identificativa CE da parte della **Nova-Ferr srl**.

Normative di riferimento:

UNI EN 13241-1	"Porte e cancelli industriali, commerciali e da garage - Parte 1: Prodotti senza caratteristiche di resistenza al fuoco o controllo del fumo"
UNI EN 12433-1:01	"Porte e cancelli industriali, commerciali e da autorimessa - Terminologia - Tipi di porte"

Applicazioni sistema NOVAGUIDE®

 Lo strumento fondamentale per la costruzione dei Portoni a libro, Portoni scorrevoli, Cancelli a battente, e Cancelli scorrevoli è il MANUALE TECNICO della Nova-Ferr srl.

La nuova Release del Manuale comprende molteplici nuove configurazioni, tra cui la parte degli scorrevoli, divise in:

- scorrevoli a terra appoggiati su ruote
- scorrevoli appesi su carrelli

Le schede tecniche racchiuse nel Manuale chiariscono e danno le informazioni necessarie e fondamentali per un corretto assemblaggio dei vari accessori della linea NOVAGUIDE® utili alla costruzione dei portoni. Su richiesta è possibile avere anche una copia del manuale in formato elettronico su CD. Nelle pagine successive si possono vedere alcuni esempi realizzabili con gli accessori della linea NOVAGUIDE®. Le schede sono un estratto del MANUALE TECNICO.

Un software personalizzato è in grado di gestire in base alle tipologie di portoni da realizzare l'ottimizzazione dei materiali utili all'assemblaggio con le IMPORTANTISSIME distinte di taglio dei profili e delle guarnizioni. Il software viene dato su richiesta in dotazione alle forniture di materiale della linea NOVAGUIDE®. Richiesta possibile anche tramite il nostro sito Internet www.novaferr.com

 The most important tool for the construction of foldable and sliding doors, swing and sliding gates is the TECHNICAL GUIDE of Nova-Ferr Srl. The new release of this Guide includes several new configurations, among which the part relative to sliding doors, divided in:

- sliding doors on wheels
- sliding doors on hangers

The technical cards included into the Guide clarify and give information which are necessary and important for a right assembling of the various accessories of NOVAGUIDE® line useful for the construction of industrial doors. On demand it is also possible to have an electronic copy of THECNICAL GUIDE on CD. In the following pages you can see some examples which could be done with NOVAGUIDE® accessories. Cards are those of TECHNICAL GUIDE. A personalized software is able to manage, according to the kind of doors to be done, the optimization of materials useful for assembling with the very important lists of profile and seal rubber cuttings. Software is given on demand together with supplies of NOVAGUIDE® material. Demand also possible trough our web site www.novaferr.com

 L'instrument fondamental pour la construction de Portails pliables, coulissants, battants est le MANUEL TECHNIQUE de Nova-Ferr Srl. La nouvelle édition du Manuel comprend de différentes nouvelles configurations, parmi lesquelles la partie relative aux portails coulissants, divisée en:

- portails coulissants sur galets
- portails coulissants sur chariots suspendus

Les fiches techniques incluses dans le Manuel clarifient et donnent les renseignements nécessaires et fondamentaux pour un correct assemblage des différents accessoires du système NOVAGUIDE® utiles à la construction des portails. Sur demande il est possible d'avoir aussi une copie électronique du MANUEL sur CD.

Dans les pages suivantes on peut voir des exemples réalisés avec les accessoires du système NOVAGUIDE®. Les fiches techniques sont celles du MANUEL TECHNIQUE. Un software personnalisé peut exploiter, selon les modèles de portails à réaliser, l'optimisation des matériaux utiles au montage avec les listes très importantes de coupe des profils et des protections en gomme. Le software est donné sur demande avec les fournitures de matériel du système NOVAGUIDE®. Demande aussi faisable sur notre site internet www.novaferr.com

 El instrumento fundamental para la construcción de Puertas plegables, Puertas correderas, Cancelas batientes y correderas es el MANUAL TÉCNICO de Nova-Ferr srl. La nueva realización del Manual está completo de muchas y diferentes posibilidades de realización, entre las cuales están las puertas correderas, divididas en:

- Correderas apoyadas sobre ruedas
- Correderas colgadas a carros superiores

Las diferentes hojas técnicas del Manual clarifican y dan todas las informaciones necesarias y fundamentales para un correcto uso y ensamblaje de los diferentes accesorios de la línea NOVAGUIDE® útiles para la construcción de puertas industriales. Se puede solicitar un CD con una copia del manual técnico en formato electrónico. En las siguientes páginas se pueden ver algunos ejemplos de las estructuras realizable con los accesorios de la línea NOVAGUIDE®.

Las páginas técnicas son extractos del MANUAL TÉCNICO. Un software personalizado es capaz de gestionar, según la tipología de las puertas que se quieren realizar, la optimización del material necesario para el ensamblaje, además de una hoja de calculo para realizar los cortes necesarios para los perfiles y la goma. El software puede ser solicitado a los comerciales o a través del sitio web www.novaferr.com

 Для изготовления складчатых, подвесных, распашных, откатных ворот очень важно использовать Техническое Руководство Nova-Ferr Srl. Новое издание включает в себя новые конфигурации, в которых откатные ворота разделены на два раздела :

- откатные ворота на колесах и
- откатные ворота на каретках.

Технические рисунки в Руководстве дают необходимую информацию и являются обязательными для корректной сборки аксессуаров для изготовления ворот из серии NOVAGUIDE®. По запросу может быть предоставлена копия Руководства в электронном формате на диске. На следующих страницах вы сможете увидеть примеры ворот, которые можно изготовить с помощью аксессуаров из серии NOVAGUIDE®.

Технические рисунки взяты из Технического Руководства. Также в наличии специализированная программа, с помощью которой можно оптимизировать используемые материалы для сборки ворот в зависимости от их типа. С помощью данной программы подсчитываются точные размеры для нарезки профилей и уплотнителей. Программа предоставляется по запросу заказчикам аксессуаров из серии Novaguide. Также запрос можно отправить через наш сайт www.novaferr.com

 Das Hauptinstrument für den Bau von Falttüren, Schiebetore, Drehtore und Schiebetore ist das NOVA-FERR S.r.l. TECHNISCHE HANDBUCH. Die neue Ausgabe des Handbuchs enthält mehrere neue Konfigurationen, Schiebetore einschließen und ist so unterteilt:

- Schiebtore auf Bodenschinie
- aufgehängten Schiebtore und Falttore

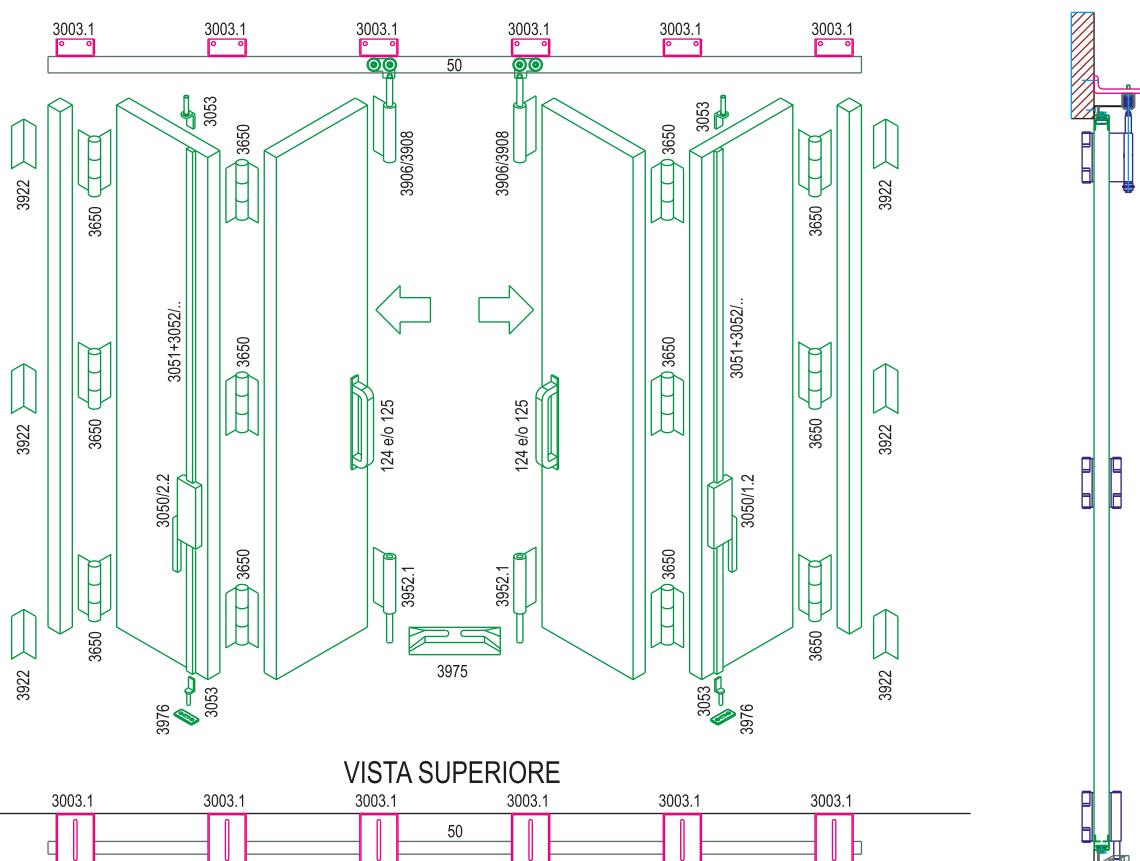

Alle Datenblätter sind im TECHNISCHEN HANDBUCH enthalten und erklären die notwendige und wesentliche Informationen um, die Tore richting mit den verschiedenen NOVAGUIDE® Zubehör zusammenzufassen. Das TECHNISCHE HANDBUCH ist auf Anfrage, in elektronischer Form (CD) erhältlich. Auf den folgenden Seiten finden Sie einige Beispiele, die mit den NOVAGUIDE® Zubehör realisierbar sind.

Die Datenblätter sind ein Auszug des TECHNISCHEN HANDBUCHS

Unsere maßgeschneiderte Software kann die Optimierung der Zusammenbaumaterialien, entsprechend den Typen von Toren, zuverwalten, durch die wichtige Tabellen für Profil und Dichtungsabschnitt. Die Software ist auf Anfrage zusammen mit NOVAGUIDE® Materialien geliefert. Man kann sie von der Website www.novaferr.com anzufordern.

Principio C:

montante altezza di 1 piano

Principio D:

montante altezza di 2 piani

(*) Altezza parapetto muratura

(**) Collegamento del montante, ottimale a H/5, giusto sotto la traversa del parapetto, (se esistente) tenendo in considerazione le condizioni per il successivo tamponamento.

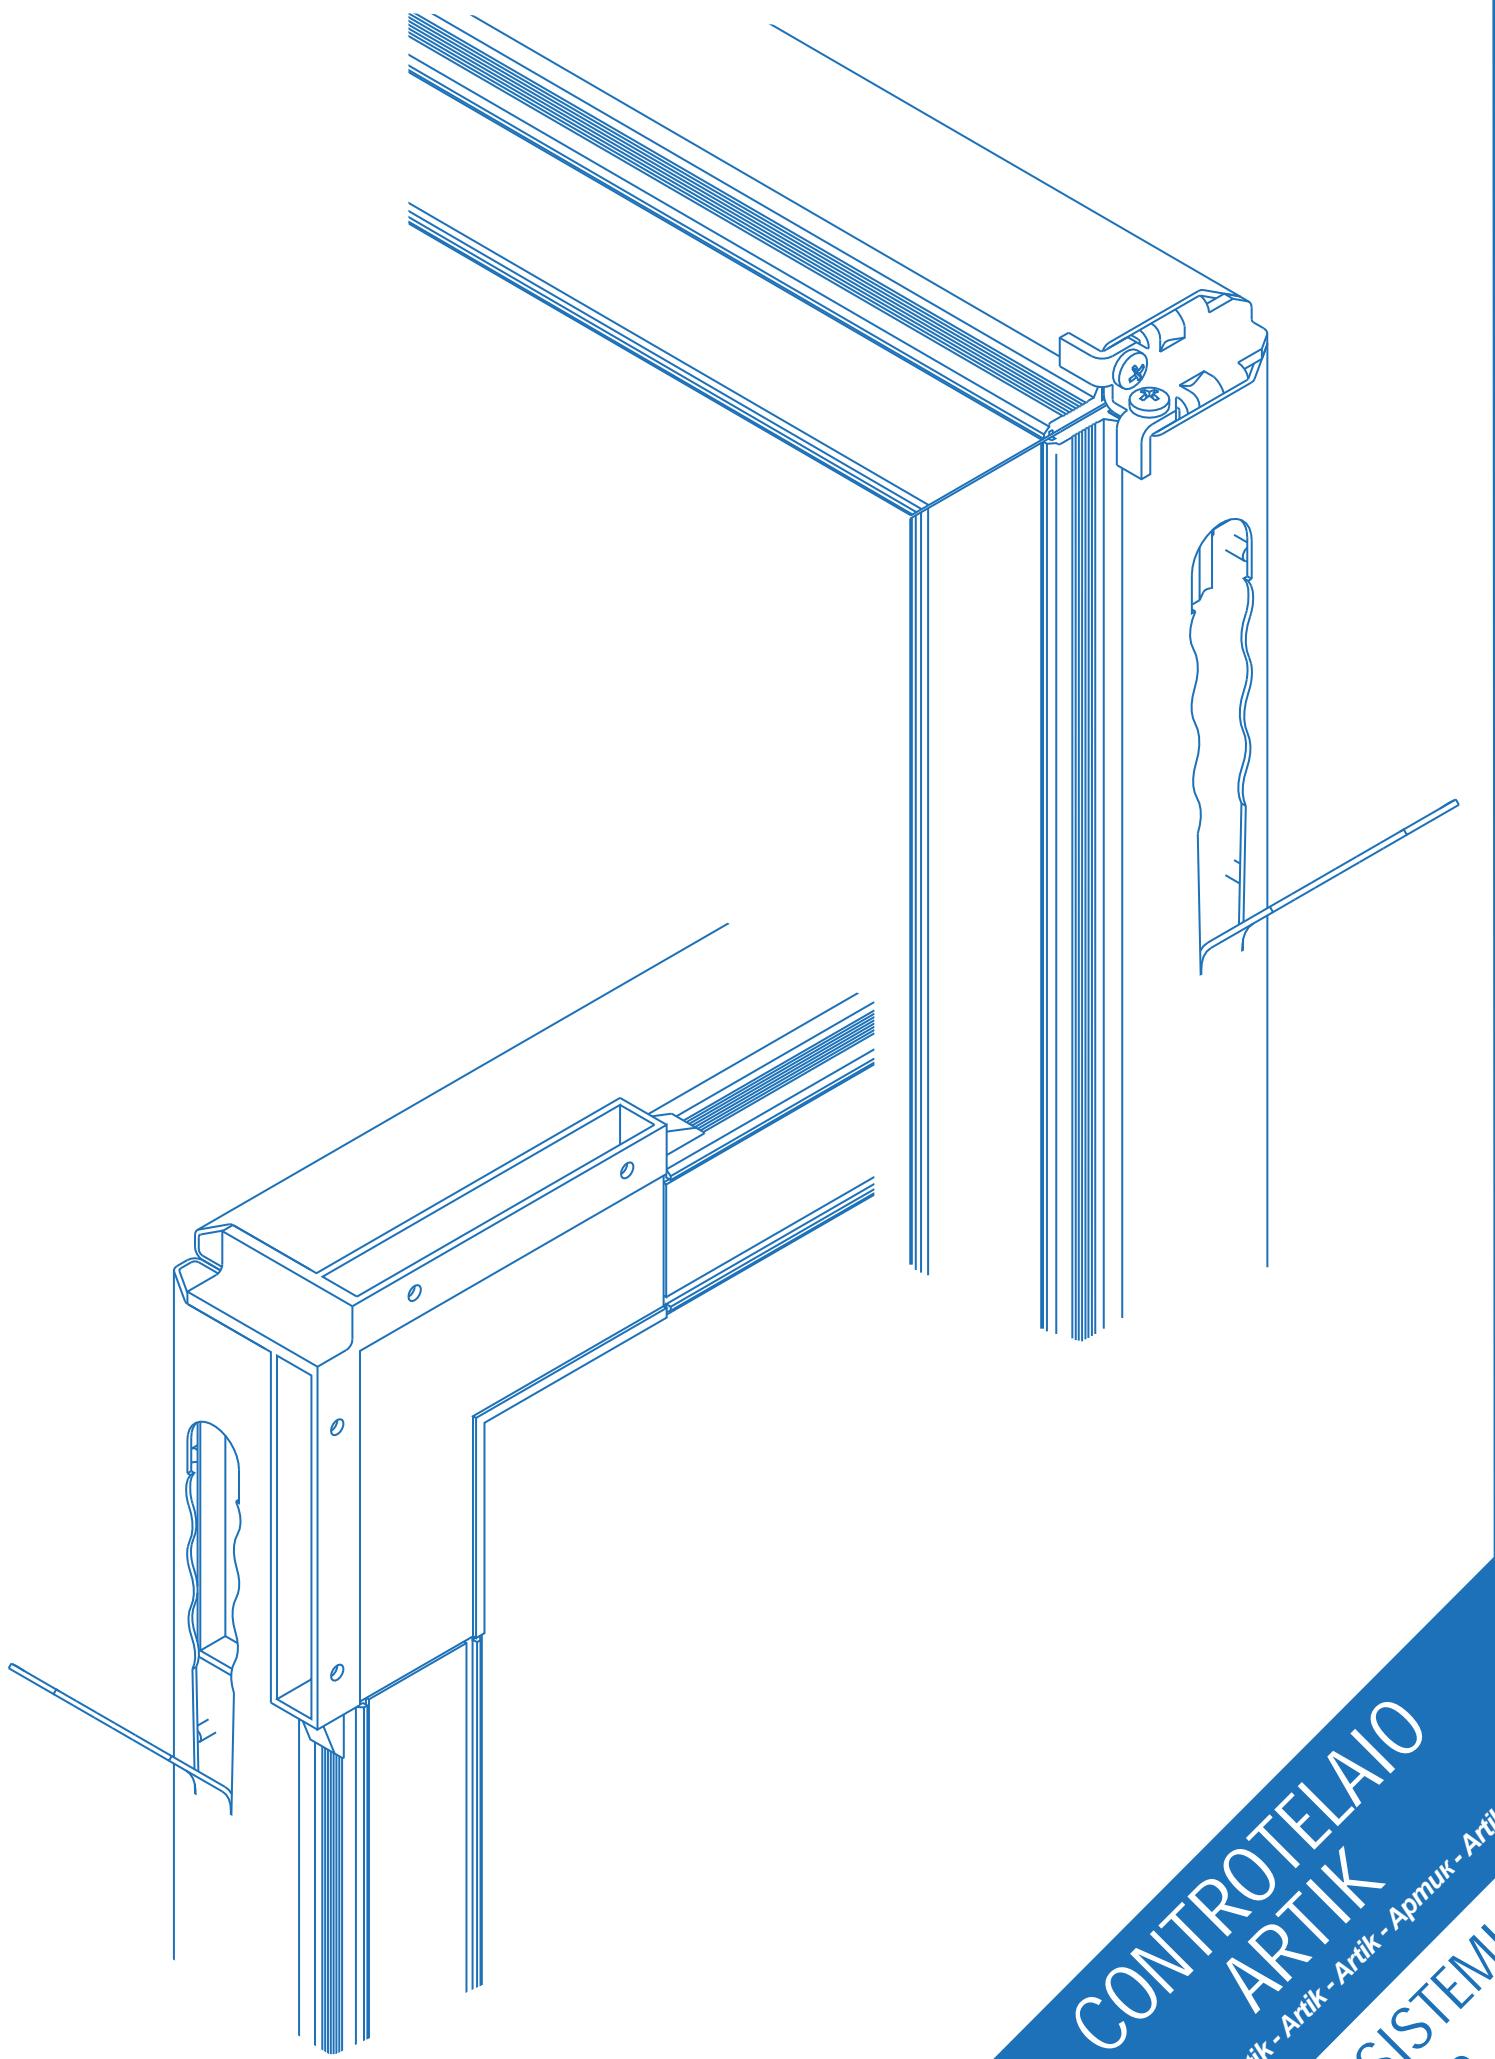

Nella realtà, ci si trova con la soletta pulita dove posizionare le staffe (), quindi il collegamento tra i 2 montanti avviene in questo punto, anche per tenerlo il più possibile nascosto dall'interno.

Esempi di applicazione controtelaio a taglio termico ARTIK

CONTROTELAI A TAGLIO TERMICO

L'elemento di separazione

CONTROTELAI
ARTIK
CAT.SISTEMI
N.2

Artik - Artik - Artik - Artik - Artik - Apmuk - Artik

Descrizione Generale

Il controtelaio ARTIK nasce dall'esigenza di migliorare il giunto serramento / muro in riferimento all'efficienza energetica (trasmittanza termica) ed al benessere della vita in un ambiente sano (condensa).

● Sano

elimina la possibilità di creazione di muffe nel giunto tra muro / serramento

● Termico

perchè il materiale esterno è PVC a bassa trasmittanza

● Completo

costruito il lamiera zincata 1,25 mm completo di zanche pretranciate per la muratura e sagomato in modo da garantire un miglior fissaggio del serramento e dell'intonaco

● Rapido

da montare anche in cantiere con le squadrette e con gli accessori ad ARTIK dedicati

● Pulito

non servono saldature

● Full optional

un certo numero di accessori permetteranno ad ARTIK di diventare un sistema di POSA IN OPERA

● Adattabile

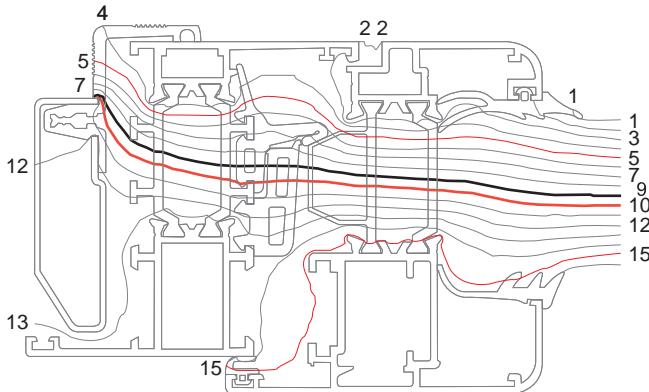

per effetto dell' abbinamento dei due materiali che lo compongono si ottengono 8+8 misure adatte a tutte le sezioni dei profili in commercio

● Universale

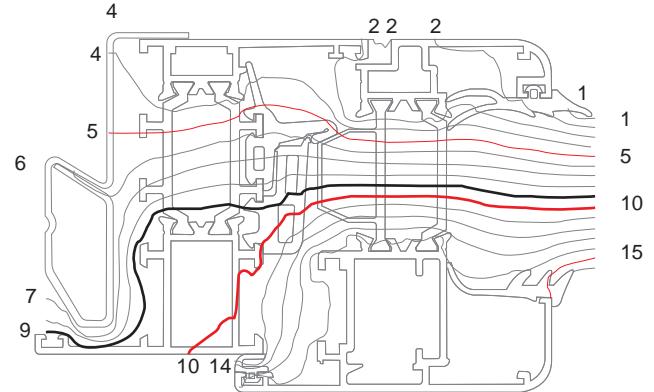

è abbinabile a tutti i materiali usati per produrre serramenti in alluminio, legno, PVC

TABELLA COMPARATIVA VALORI λ MATERIALI

MATERIALE	λ (W/mK)
ALLUMINIO	160
ACCIAIO	50
ABETE	0,13
COMPENSATO MARINO	0,13 - 0,16
PVC (ARTIK)	0,12 - 0,17

CONDUTTIVITÀ TERMICA (" λ ")

La conduttività termica, indicata dal valore " λ "(lambda), è la capacità di un materiale di trasmettere calore ed è caratteristica propria di ogni singolo materiale.

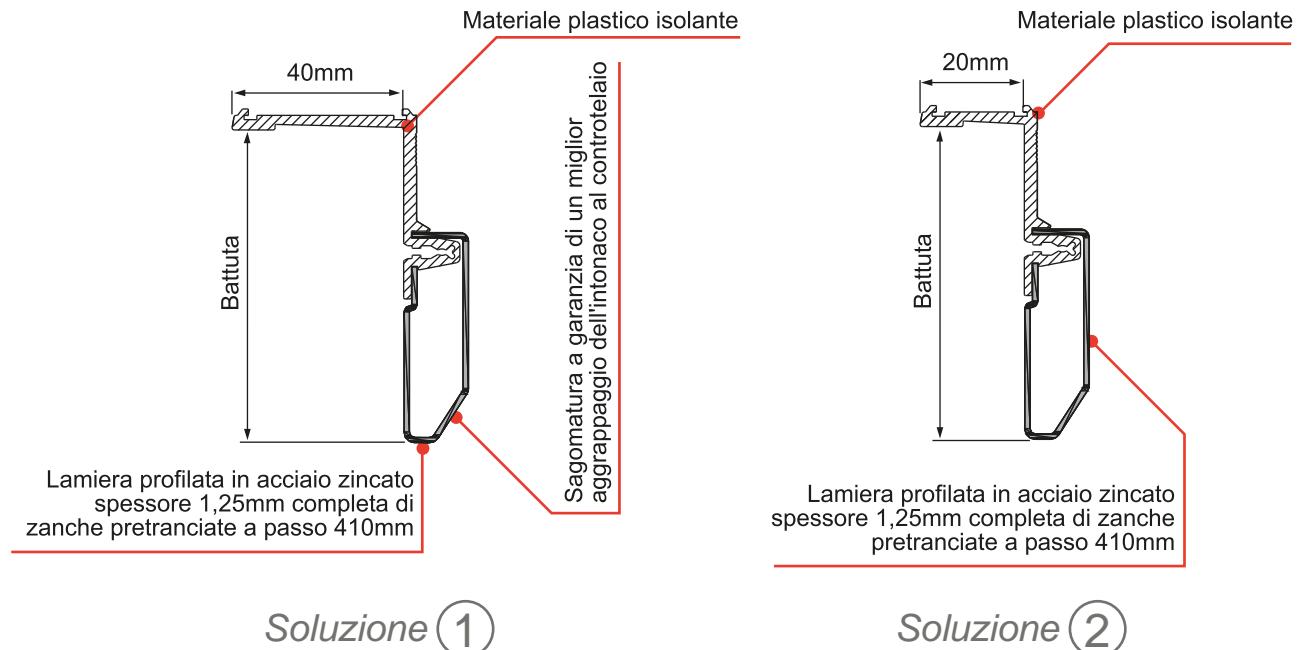

Utilizzo ARTIK

ARTIK

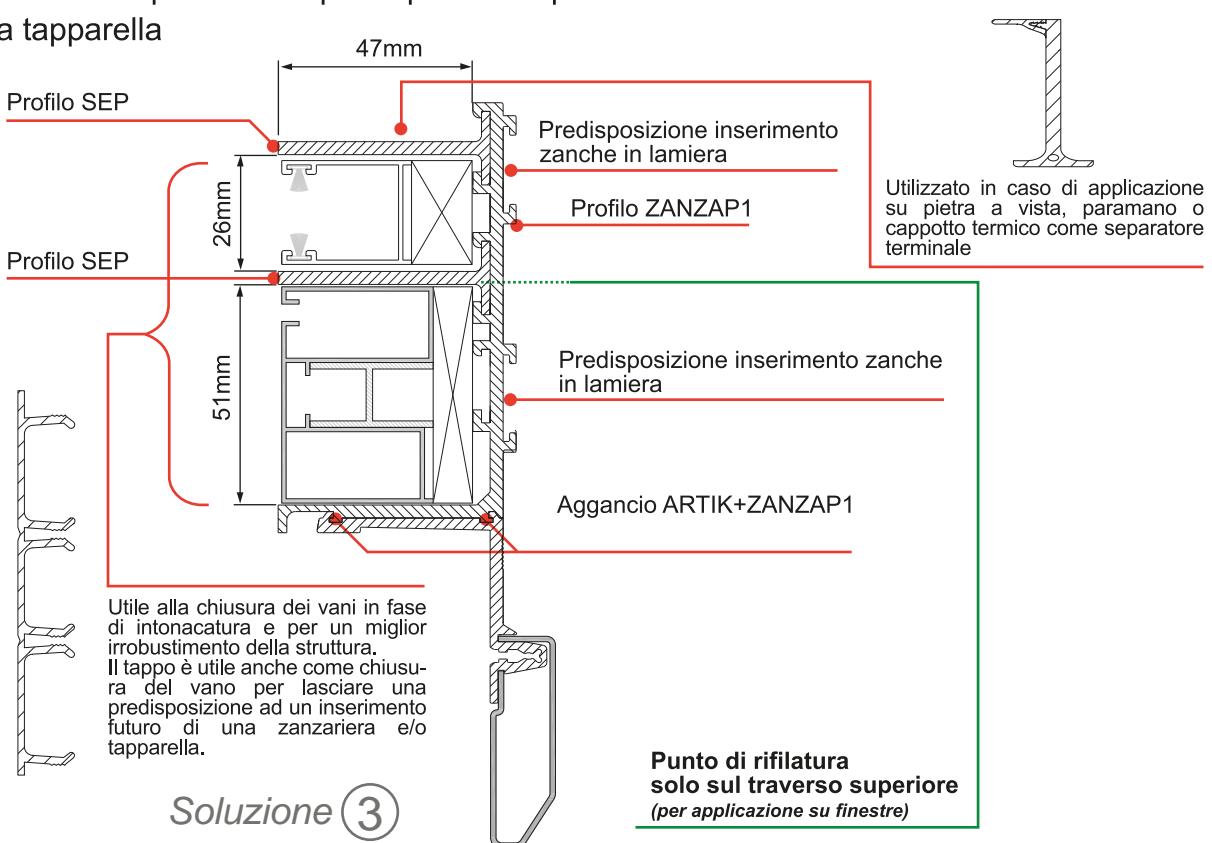

Per un'adattabilità sulla maggior parte delle sezioni dei profili in commercio, la dimensione della battuta di **ARTIK** varia rispettando le seguenti misure:

45 - 52 - 55 - 57 - 61 - 64 - 67 - 73mm

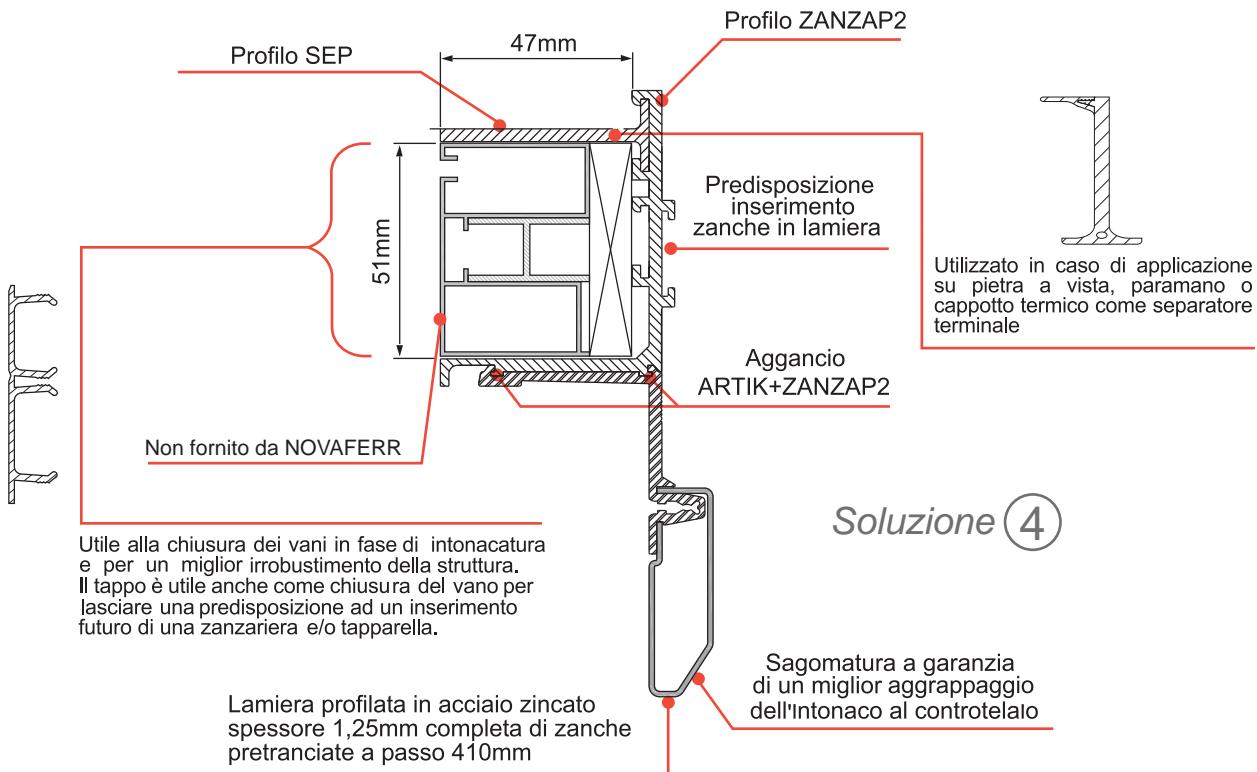

ARTIK + ZANZAP1

Il profilo **ZANZAP1** permette la predisposizione per l'inserimento di una zanzariera e di una guida tapparella

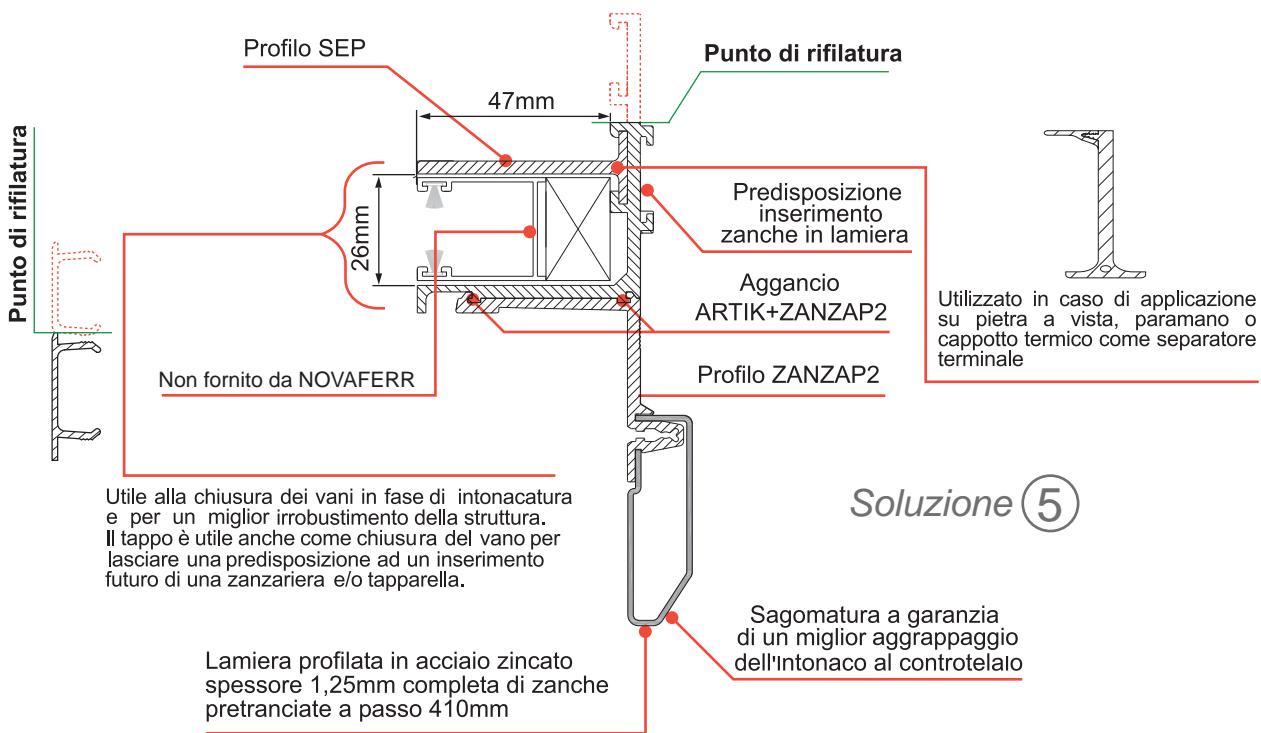

ARTIK + ZANZAP2

Il profilo **ZANZAP2** permette la predisposizione per l'inserimento di una zanzariera a scomparsa

ARTIK + ZANZAP2 rifilato

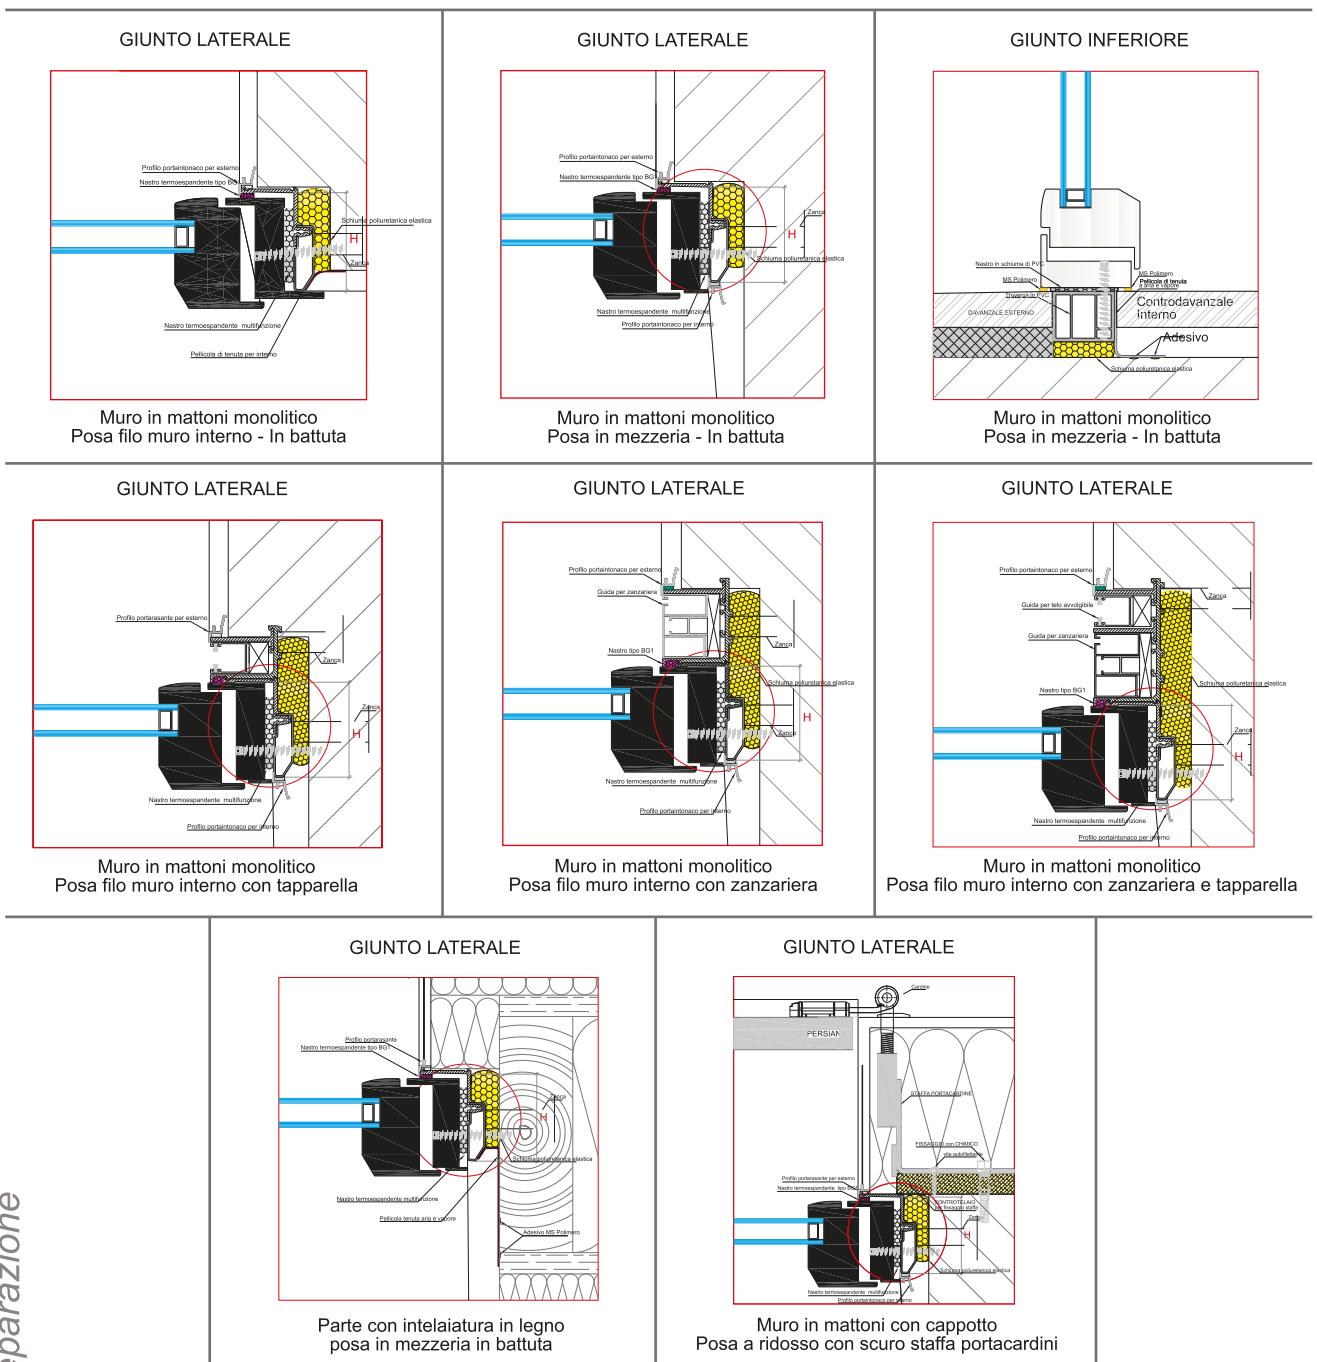

Il profilo **ZANZAP2 rifilato** permette la predisposizione per l'inserimento di una guida tapparella. Utilizzando il profilo ZANZAP2 eseguire la rifilatura come nell'esempio.

ARTIK

ARTIK KIT

Il kit viene consegnato imballato in un tubo di cartone con tutte le parti pre-assemblate ad esclusione del rinforzo telescopico e del rinforzo angolare RING.

Il rinforzo telescopico viene considerato optional in quanto potrebbe essere riutilizzato quello già utilizzato per lavori precedenti.

I rinforzi angolari vengono considerati optional in quanto potrebbero essere riutilizzati quelli già utilizzati per lavori precedenti.

In caso di ordine è fondamentale indicare se i rinforzi RING o i rinforzi telescopici sono da inserire
